SHOWA Atlas 381

Ultimate Precision, No Perspiration

FEATURES

- + Exceptional Grip
- + Enhanced Breathability
- + Level 4 Abrasion Resistance
- + High Dexterity

Take comfort and protection to the next level with SHOWA 381 – the lightest microporous nitrile coated glove with an abrasion resistance up to level 4 (EN388). The microfiber liner absorbs perspiration and moisture almost instantly, providing 20% more breathability and moisture evacuation versus the standard offering.

Absorbs & dissipates sweat helping hands to stay cool and dry

OVERVIEW

COATING: Nitrile Foam	RECOMMENDED APPLICATION: Aerospace Automotive Manufacturing Warehousing & Distribution
GRIP: Rough	
LINER: Microfiber	LENGTH: 220 - 260 mm
COLOR: Grey/Black	SIZES: 06 - 10

BENEFITS

- + Embossed 'S' shaped palm pattern disperses oil away to increase grip
- + Excellent level of tactility and sensitivity
- + Microfiber properties boost vapor permeation and enhances breathability
- + Low lint with microfiber
- + No latex allergy risks
