“An innovative solution that reduces pollution.”

DESCRIPTION
SHOWA® has done it again by creating the world’s first biodegradable nitrile glove line. SHOWA’s Research & Development reaches a major breakthrough with ECO BEST TECHNOLOGY (EBT). EBT accelerates the biodegradation of nitrile in biologically active landfills and anaerobic digesters, as validated by independent certified laboratories, using internationally recognized test methods. EBT is comprised of organic materials designed to make SHOWA biodegradable nitrile gloves attractive to microbial activity. These micro-organisms, upon consuming the EBT material, excrete enzymes that depolymerize the nitrile. The final result is biogases and inert humus.
